T. Sathiyanarayanan

has successfully completed the online, non-credit Specialization

Generative AI for Human Resources

This specialization provided practical skills to leverage generative AI to enhance a career in HR. Learners gain an understanding of the core concepts, capabilities, tools, and applications of generative AI. They explored prompt engineering techniques for writing effective prompts to produce desired outcomes. Specifically, learners discovered using generative AI in the HR domain. They gained practical skills in leveraging generative AI for different functions in HR. The learners explored common generative AI tools and platforms, such as ChatGPT, Google Gemini, and IBM watsonx Orchestrate, which can be leveraged for HR use cases. By completing the hands-on labs and projects, the learners explored the use cases of generative AI for use cases in the HR domain.
